

RDK-1411 Rugged Docking Kit

The Globalstar Rugged Docking Kit is designed to enhance the capabilities of the Qualcomm GSP-1600 Handset by allowing users to conveniently place and receive voice and data calls from inside vehicles, buildings, command posts, or in remote locations with ease. Developed with true mobility and durability in mind, the lightweight RDK-1411 is housed in a water-proof, dust-proof, and crush-proof briefcase that can be powered by either 120v (household electrical) or 12v (vehicle cigarette lighter) power sources.

Simply plug in the power cord, position the magnetic-mount antenna, and place and receive voice calls with hands-free capability or with the included privacy handset. Data calls for email and internet access may be placed just as easily and quickly from PDA's or Laptop computers by utilizing the conveniently accessible RS232 Serial Data Port.

The RDK-1411's rugged case and construction combines convenient, portable, indoor and in-vehicle functionality of the Globalstar GSP-1600 Handset with unmatched durability and protection.

RDK-1411 Standard Features:
