

Access email and internet data no matter where life takes you.

Globalstar Data Services lets you access internet data and email through the Globalstar satellite network.

Your laptop connects to a Globalstar phone with a single Data Kit cable.

Globalstar Data Services is also compatible with most PDAs.

*\*Included in Data Kit. Other items sold separately.*

## Globalstar Data Services

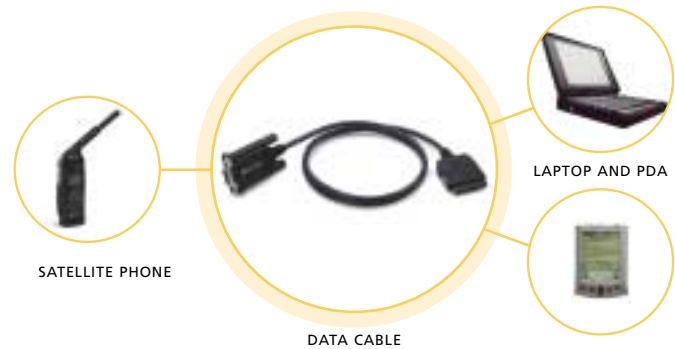

Internet Access

## Globalstar data communications go beyond the limits of cellular!

When life or work takes you beyond cellular coverage, Globalstar provides the remote data services that keep you connected to the information you need, when you need it. If web email, weather, news, and access to information are important to you, consider Globalstar Data Services to keep in touch with colleagues and family.

## Globalstar Data Services

### INTERNET ACCESS

**Internet Access from Globalstar** allows you to go beyond the limits of cellular data services. Easy to install and use, you choose what your Globalstar phone is attached to: a laptop computer or a PDA (personal digital assistant). No hassling with 12 keys on a phone keypad and limited lines of text on a small phone display screen.

Globalstar Data Services provides up to three times the data link-up speed of most mobile satellite services. Using the reliability of satellite communications, Globalstar Data Services keeps you connected with the rest of the world.
