

# WaveCall SatSpeed

## Internet Compression Services

SatSpeed is an Internet Compression Service exclusive to WaveCall™ that allows users to upload and download files 3 to 5 times faster. For example, using SatSpeed software a 9.6 kbps rated modem operates like a 56K landline modem. With larger, more sophisticated modems, even greater speeds can be achieved.

Using the service is easy via the insertion of a CD into your computer. Thereafter Internet and file transfers are automatically compressed and routed through a dedicated server with a high-speed fiber optic connection to the Internet. Features include:

- File transfer and Web surfing up to 500% faster
- Works on both uploads and downloads
- User configurable for optimum e-mail and Internet speed
- Can be easily activated or deactivated on any connection
- Does not affect voice circuit quality
- SatSpeed is available with each 2100, 2100R, and 2101 system
- Sea Tel® service support and reliability
